

Phase funding for Najran, Jazan and Northern Borders

SAR 40 million

Requested funding envelope

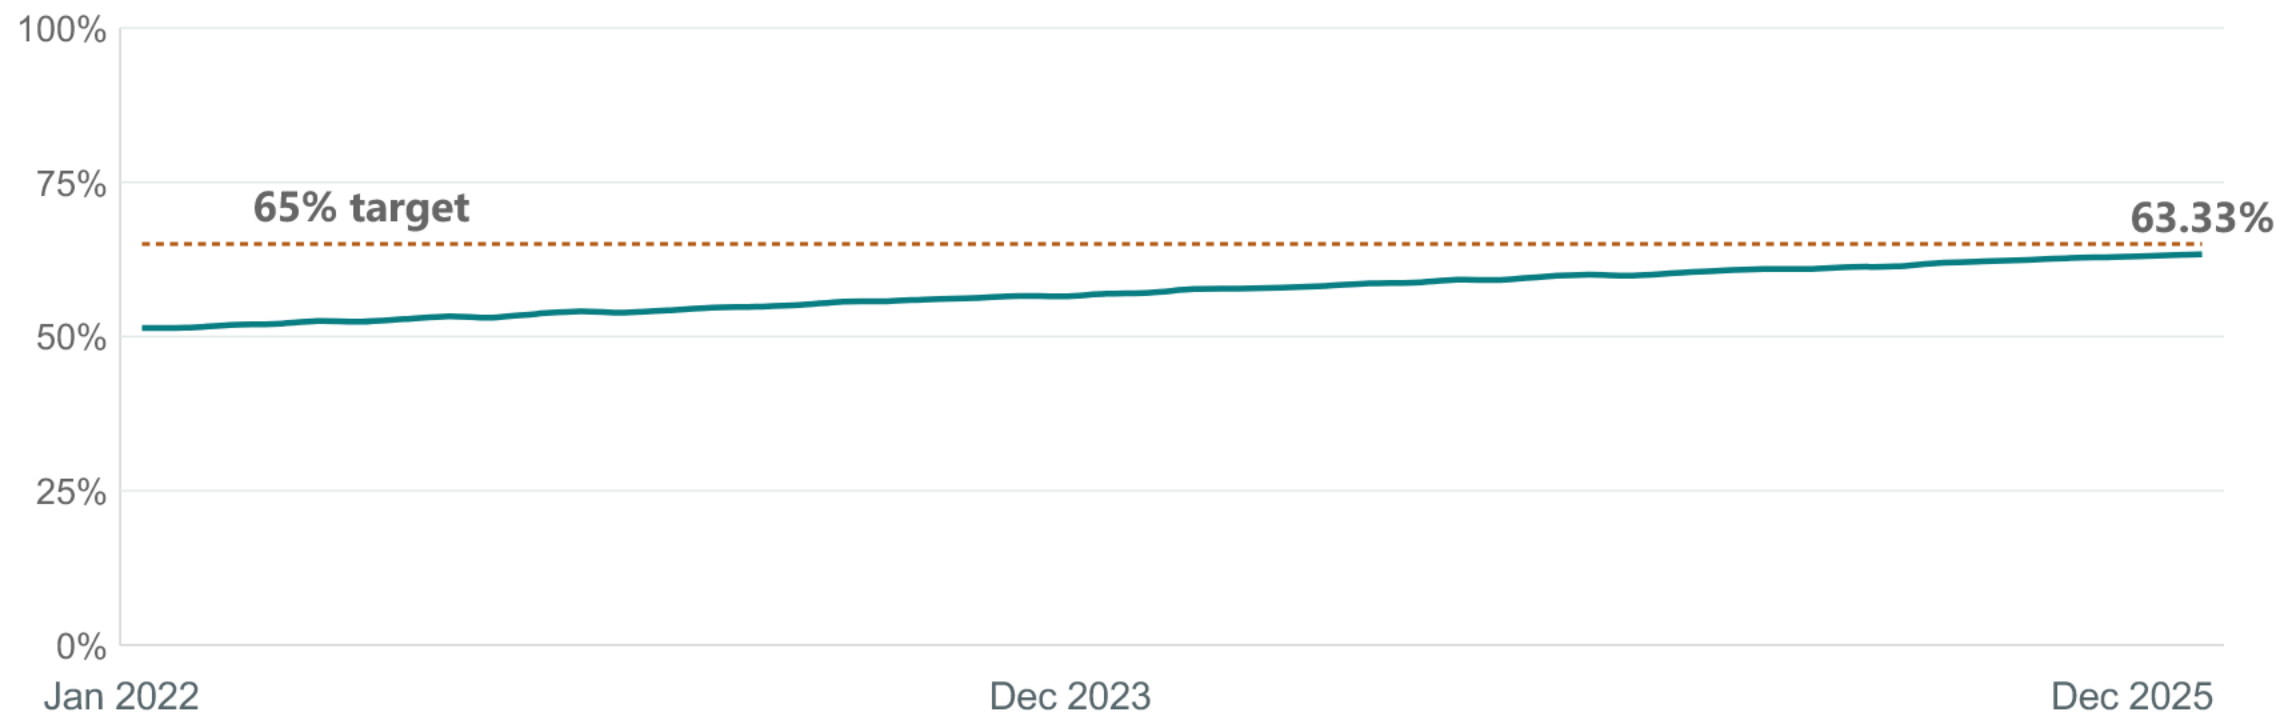

Release SAR 10M after baseline approval; hold SAR 30M

Move lagging regions toward the 65% adoption target

National course adoption remains below 65%

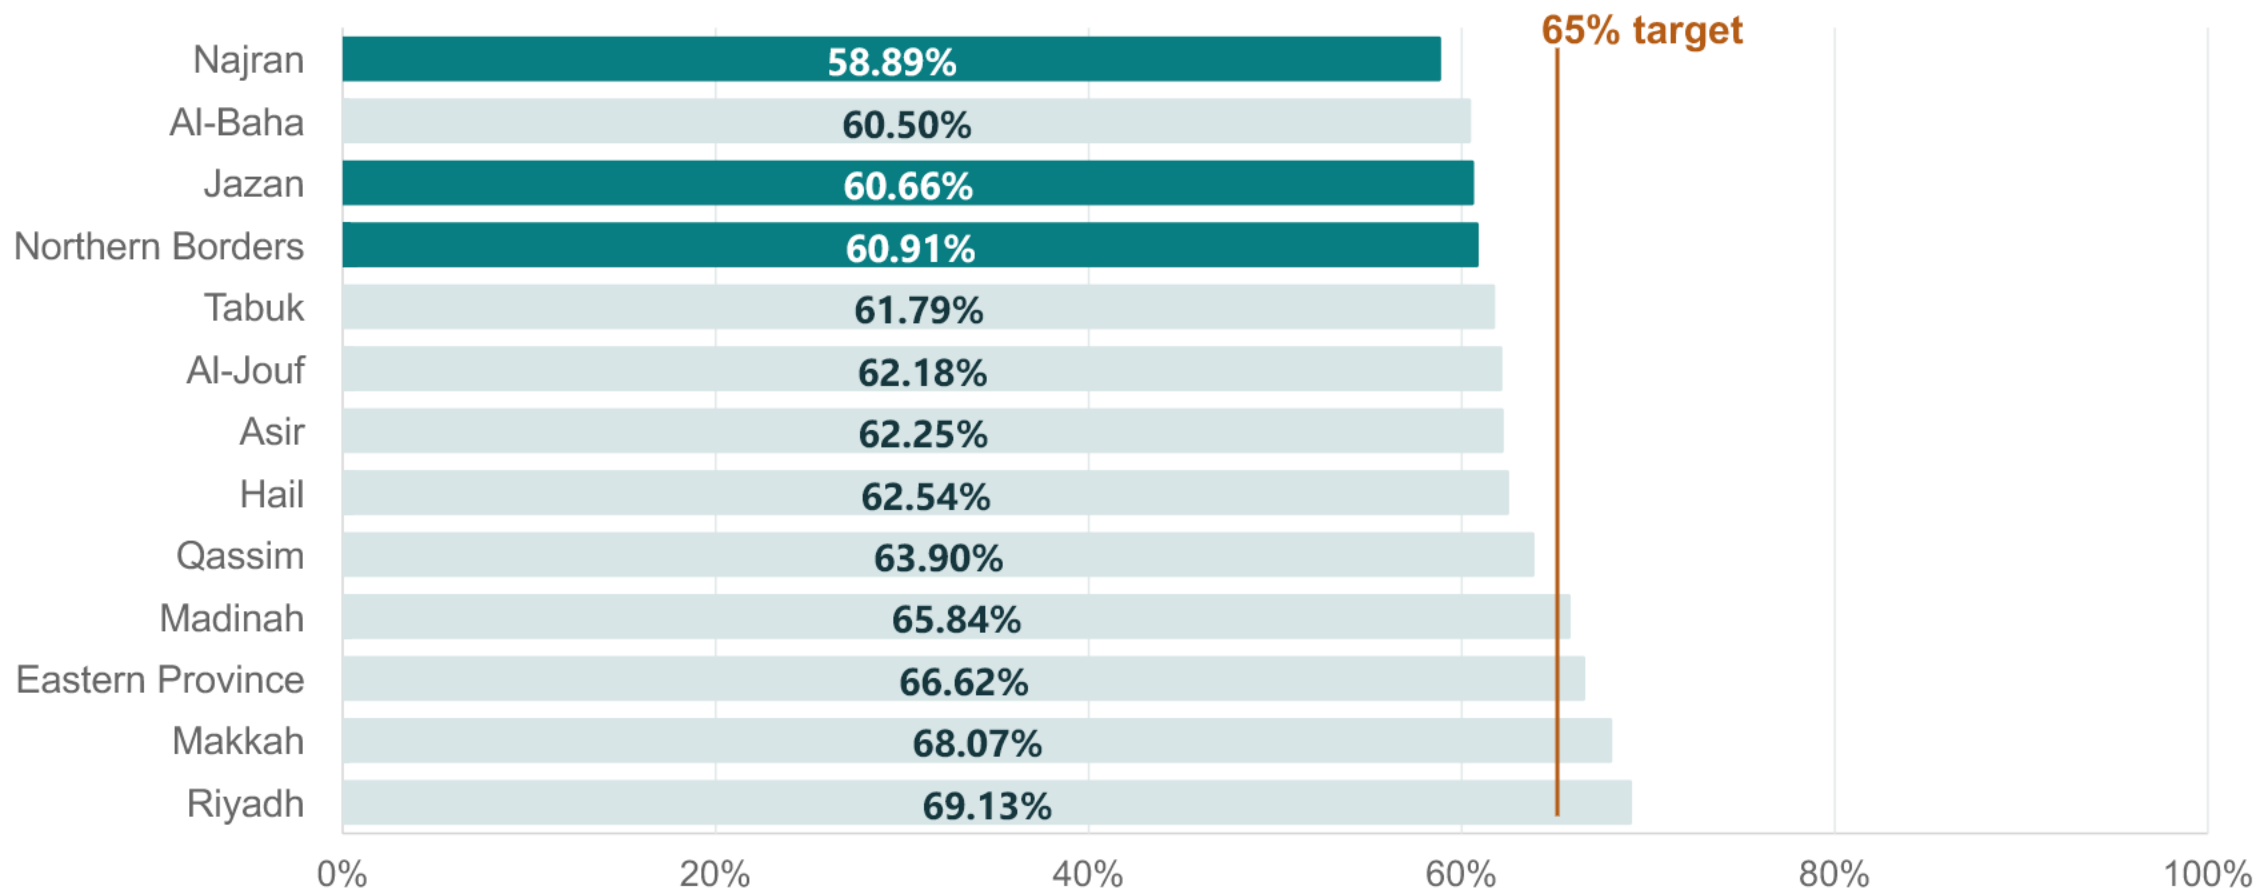

December 2025: a 1.67 percentage point gap

63.33%

Transaction-weighted alternative: 66.12% (>65%). Target status depends on the definition.
Course arithmetic-mean index, not the digital transaction share. 48 months of synthetic data.

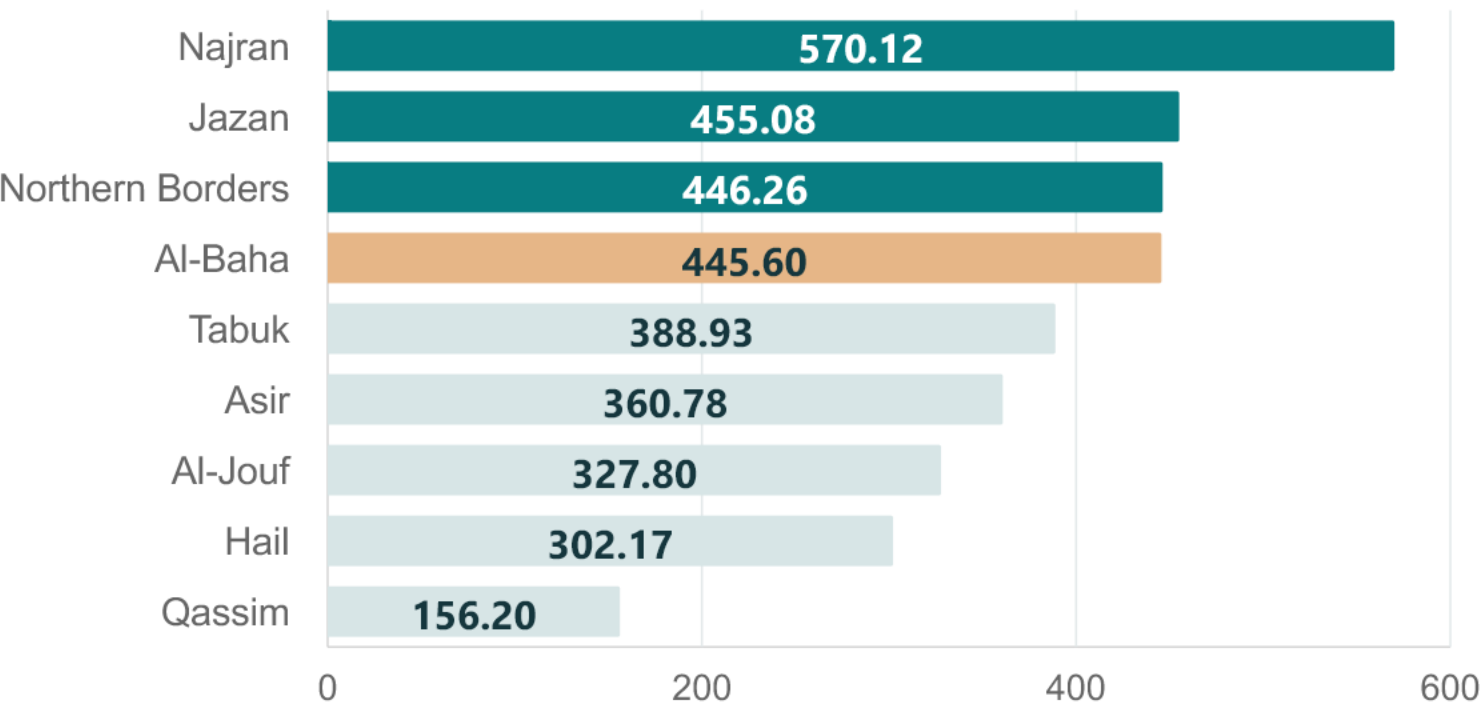

Nine regions remain below target in December 2025

Latest-month mean. Teal identifies the proposed pilot regions. Synthetic training data.

Najran leads; third place needs validation

December 2025 · Synthetic data · Teal: proposed pilots; orange: Al-Baha alternative

42.61%

Selected regions’ share of the laggards’ priority index

Target gaps (pp)

- Najran 6.11
- Jazan 4.34
- Northern Borders 4.09

Priority proxy = positive gap / 100 × December transactions; not a conversion count

Near tie: Northern Borders 446.26 vs Al-Baha 445.60

Metric sensitivity: transaction weighting selects Al-Baha instead of Jazan. Agree the definition before release.

Staged funding allows adjustment after the pilot

Option	SAR 40M allocation	Benefit	Tradeoff
Equal allocation	SAR 40M ÷ 9 (about 4.44M each)	Covers all nine laggards	Ignores differences in gap and activity
Full concentration	SAR 40M in three regions	Focuses on current priorities	Commits all funding before testing
Staged funding	SAR 35M regional + SAR 5M reserve	Focus with a review before scaling	Requires agreed metrics and evaluation

Selected: SAR 10M after baseline approval; hold SAR 30M for review

These are allocation policies. The data do not estimate causal returns for each option.

SAR 35M targets the regions; SAR 5M supports reassessment

Allocation	SAR million
Najran	13
Jazan	11
Northern Borders	11
Evaluation reserve	5
Total	40

64.45%

National index if all three reach 65% and every other region stays unchanged

Conditional arithmetic, not an investment forecast

Proposed envelopes, not cost estimates. Closing these three gaps alone does not meet the national target.

Approve the envelope now; scale after the day-90 review

Approve SAR 40M; pilot SAR 10M after baseline approval

After approval	Action and decision
Day 0	Approve the envelope and name an accountable owner
Within 30 days	Approve metric, baseline, comparison and cost; then launch pilots
Day 90	Review impact and cost before releasing further funding

Proposed continuation goal: +2pp with stable satisfaction and service performance

A management goal, not a prediction. Check comparison groups and service mix before attributing improvement.
